AMX Technical Specification

This outlines the **minimum** technical specification to support a local installation of AMX.

Client Machine:

- Windows based PC
- Graphics card and monitor with a 1024x768 resolution, 256 colour display (16 bit high colour recommended)
- 500 Mb RAM or Higher
- Minimum 100 MB free disk space on the target drive.
- Windows 2000 or later (excl Windows 8 RT)
- .NET Framework 2.0 or later

Server Machine:

- Processor: 2.0 GHz +
- Memory: 1 GB +
- HDD: As a guide a new installation with initial data import is approximately 200Mb and standard usage increases this by less than 1 GB per annum.[1]
- MS Windows 2000/2003 Server or above
- MS SQL Database Server 2000 or above (Also Express Versions)[2]

---

[1] If images and documents are stored in the database rather than in a network location the database may increase in volume significantly

[2] The AMX System only uses the Database Engine component, so no additional features are required. However, on occasion the Management Studio element may be useful so can be included.
